Research Papers

Saline intrusion and refreshening in a multilayer coastal aquifer in the Catania Plain (Sicily, Southern Italy): dynamics of degradation processes according to the hydrochemical characteristics of groundwaters
B. Capaccioni, M. Didero, C. Paletta and L. Didero 1
Stochastic simulations of steady state unsaturated flow in a three-layer, heterogeneous, dual continuum model of fractured rock
W. A. Illman and D. L. Hughson 17
Flow routing in large-scale models using vector addition
D. Shaw, L. W. Martz and A. Pietroniro. 38
Analytical study of capture zone of a horizontal well in a confined aquifer
M. Kompani-Zare, H. Zhan and N. Samani. 48
Tracer experiments in the Rhine Basin: evaluation of the skewness of observed concentration distributions
A. van Mazijk and E. J. M. Veling. 60
On the evaluation of dispersion coefficients from visualization experiments in artificial porous media
P. Gaganis, E. D. Skouras, M. A. Theodoropoulou, C. D. Tsakiroglou and V. N. Burganos. 79
On the use of neural networks to evaluate groundwater levels in fractured media
S. Lallahem, J. Mania, A. Hani and Y. Najjar. 92
On the distribution of scaling hydraulic parameters in a spatially anisotropic banana field
C. M. Regalado. 112
Characteristics of rainstorms over a temperate region derived from multiple time series of weather radar images
G. J. M. De Lannoy, N. E. C. Verhoest and F. P. De Troch. 126
Hydrologic impact of climate change in the Saguenay watershed: comparison of downscaling methods and hydrologic models
Y. B. Dibike and P. Coulibaly 145
Nonstationary hydrological time series forecasting using nonlinear dynamic methods
P. Coulibaly and C. K. Baldwin 164
Frequency analysis of nonidentically distributed hydrologic flood data
V. P. Singh, S. X. Wang and L. Zhang. 175
Estimating snow evaporation with GPS derived precipitable water vapour
C. Valeo, S. H. Skone, C. L. I. Ho, S. K. M. Poon and S. M. Shrestha. 196
A comparative assessment of efficient uncertainty analysis techniques for environmental fate and transport models: application to the FACT model
S. Balakrishnan, A. Roy, M. G. Ierapetritou, G. P. Flach and P. G. Georgopoulos 204
Scale effects on specific sediment yield in the Yellow River basin and geomorphological explanations
X. Jiongxin and Y. Yunxia. 219
Effect of submerged flexible vegetation on flow structure and resistance
J. Järvelä. 233
Microwave remote sensing of soil moisture: evaluation of the TRMM microwave imager (TMI) satellite for the Little River Watershed Tifton, Georgia
J. Cashion, V. Lakshmi, D. Bosch and T. J. Jackson 242

doi:10.1016/S0022-1694(05)00222-2

Soil moisture content estimation using ground-penetrating radar reflection data
I. A. Lunt, S. S. Hubbard and Y. Rubin 254
The Bagni di Lucca thermal waters (Tuscany, Italy): an example of Ca-SO_4 waters with high Na/Cl and low Ca/SO_4 ratios
T. Boschetti, G. Venturelli, L. Toscani, M. Barbieri and C. Mucchino 270
Effect of rainfall and tillage direction on the evolution of surface crusts, soil hydraulic properties and runoff generation for a sandy loam soil
B. Ndiaye, M. Esteves, J.-P. Vandervaere, J.-M. Lapetite and M. Vauclin 294
